

# CONTROL VALVE SOLUTIONS

# VALVE SERVICE

TAILOR-MADE SOLUTIONS  
FOR ALL CONTROL VALVE  
AND RELATED PRODUCTS,  
INCLUDING ISOLATION  
VALVES, SPECIFICALLY FOR  
THE OIL & GAS INDUSTRY.

CVS HAS THE EXPERIENCE AND EXPERTISE TO OFFER A COMPLETE SERVICE AND REPAIR PACKAGE FOR BOTH PLANNED AND REACTIVE MAINTENANCE NEEDS, TO MAKE VALVE SERVICING AS HASSLE FREE AS POSSIBLE.

The overhaul or repair of valves is carried out in a purpose built valve workshop with state of the art test facilities. With process conditions having a major effect on the trim, shaft, packing and actuator, CVS invest time in simulating the conditions correctly during valve set up so that the optimum valve performance can be assured.

## WORKSHOP CAPABILITIES

Site surveys provide information on the condition of valves and control systems, which can be incorporated in preventative programmes, producing the most effective plant maintenance regime. Failed valves repairs can be made spontaneously to keep production flowing while a suitable solution is scheduled for a suitable time.

## ON-SITE SERVICING

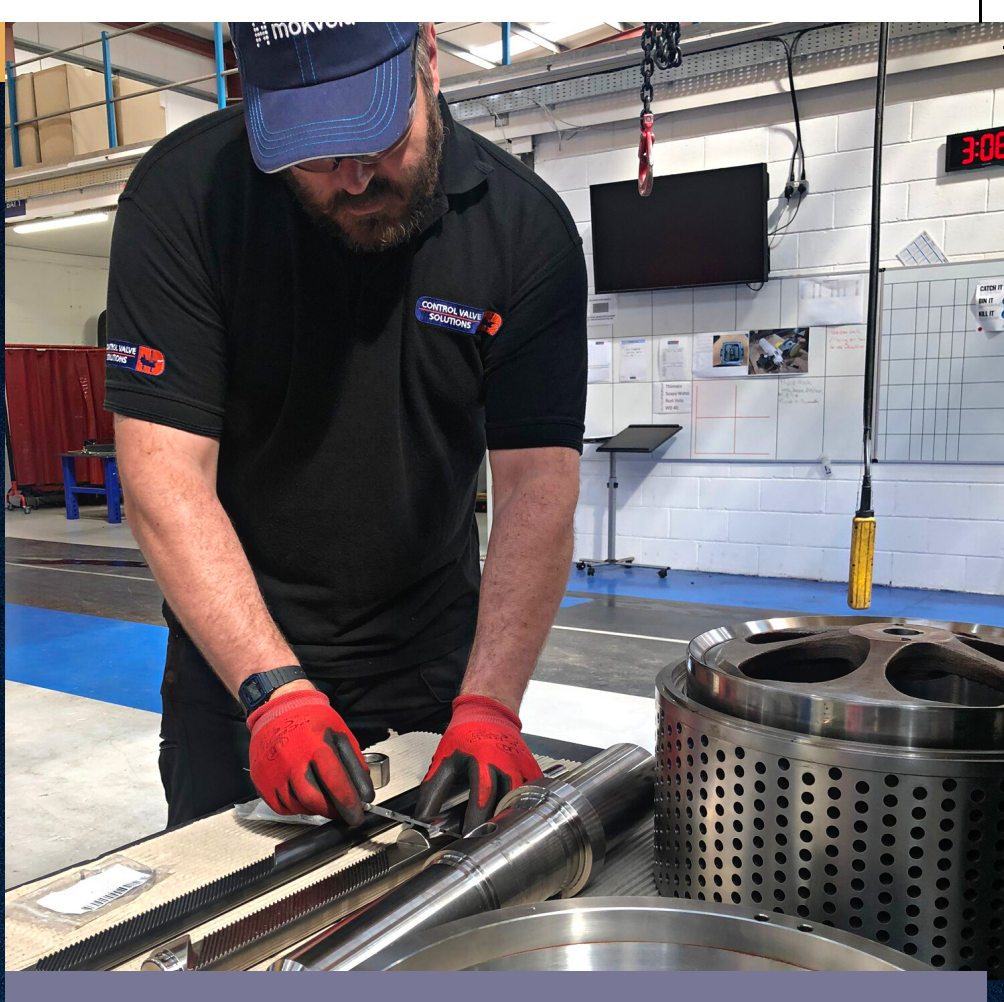

Quality is critical to CVS' success, and the firm is committed to providing clients with the highest quality valve supply, service, testing, and management at all times. CVS follows industry standard protocols such as API, ANSI, and FCI. It further has ISO9001, ISO14001 and IS45001 accreditation which aligns with the CVS mantra of Honesty, Integrity, Transparency, and Safety.

## QUALITY ASSURED REPAIRS

CVS' EXTENSIVE WORKSHOP IS FULLY EQUIPPED TO ENSURE THAT VALVE REPAIRS AND OVERHAULS ARE CARRIED OUT TO THE HIGHEST OF STANDARDS.

A team of engineers can service and repair practically any type of valve, as well as provide logistical support to customers. With a 24/7 on-site response, this service ensures that any production downtime is kept to a minimal. Clients can speak with a skilled valve engineer or technician at any time, 365 days a year, at no extra cost.

## 24 HOUR MOBILIZATION

CVS perform valve stripping and preparation for overhaul. Assembly to each manufacturer's procedures using OEM parts. Simulation and performance testing of processes. Producing documentation that adheres to API and FCI guidelines.

## SCOPE OF CAPABILITIES

INTEGRITY

HONESTY

TRANSPARENCY

SAFETY

Unit 7, Minto Place
